## WHY A REPPY?

*Get ready to explore*

BERG's Reppy platform has 3 different models: the Rebel, the Racer and the Rider. The Reppy is positioned between the Buzzy and Buddy platform in terms of size and age. The three versions have exciting, sparkling looks, are very user-friendly for both children and parents and, of course, they are fantastic toys.

The striking sports steering wheel, the EVA 10" tyres that will never go flat, the cool bucket seat and the swing axle make go-karting exceptionally good fun. The BERG Reppy is the first go-kart for young children with genuine, low go-kart entry due to the low bucket seat.

The BERG Reppy has the following features:

- The Reppy is suitable for children from ages 2.5 to 6
- Equipped with 10" inch EVA tyres that will never go flat
- The swing axle ensures children always maintain grip on the road
- The cool bucket seat has a knob for easy seat adjustment
- Adjustable seat in 4 positions
- Easy to lift up using the frame handle
- The direct drive system makes pedalling easy
- Sleek and attractive design
- The Reppy Racer and the Reppy Rebel come equipped with Soundbox. The Soundbox is optional for the Reppy Rider
- TÜV
- CE

*Outrageous looks,  
carefree playing fun  
and easy to take with you*

## 1. SLEEK AND ATTRACTIVE DESIGN

### *Get ready to explore*

The Reppy's design makes children stand out in the neighbourhood. Take a look at that low bucket seat and striking sports steering wheel!

Adults can carry the Reppy super easily by its frame handle. The Reppy is light and compact, making it easy to store after use.

## 2. GROWS ALONG WITH YOUR CHILD

The Reppy's bucket seat is easy to adjust using the knob on the seat. No tools needed for that! Due to the low seat, it is not necessary to adjust the steering wheel. In whichever seat position a child sits, the steering wheel is always easy to reach.

The Reppy is suitable for children from ages 2.5 to 6.

*Outrageous looks,  
carefree playing fun  
and easy to take with you*

### 3. EVA TYRES

An EVA tyre is made of high-tech foam. For the BERG Reppy, high-tech foam is the ideal replacement for the traditional rubber inner and outer tyres. Thanks to the right composition, the tyres are just as wear-resistant as traditional rubber tyres but without the risk of a flat tyre. The tyres are very silent when driving, which makes them ideal for indoor and outdoor use.

*Outrageous looks,  
**carefree playing fun**  
and easy to take with you*

## 4. DIRECT DRIVE

### Get ready to explore

The BERG Reppy is equipped with a fixed connection between the front crank axle and the rear axle. This means that the movement of the legs is immediately converted to the movement of the rear wheels. This makes the BERG Reppy super simple and easy to ride. Both forwards and backwards.

An additional advantage is that the movement/rotation of the rear wheels (which occurs when pedalling, or when pushed) is also translated to the front crank axle. Therefore, once the go-kart is moving, you can continue pedalling very easily.

Also, the front and rear axles are mounted on ball bearings. As a result, the pedals and rear axle rotate smoothly and lightly!
